

Silence For LVT UNDERLAYMENT SALES SHEET

APPLICATIONS:

- Apartments
- Condominiums
- College dormitories
- Classrooms
- Hospitals
- Office buildings
- Any area where noise reduction is desired.

FOR SILENCE & PERFORMANCE

The VIUS Silence For LVT Underlayment has been specifically engineered and manufactured to reduce the passage of impact transmission caused by people walking and can be installed under vinyl plank (LVT), sheet vinyl, carpet & carpet tile.

VIUS Silence For LVT underlayment is manufactured in Germany, and is a high quality 3mm thick underlay with a factory sanded surface to eliminate knife marks in the manufacturing process and offers a flawless smooth finish to glue LVT/LVP to. The underlayment contains zero rubber so plasticize migration will not occur and is made entirely of polyurethane foam and cork. Silence For LVT was developed for its unique material composition which allows it to be a compatible surface to bond approved floor coverings such as sheet vinyl, vinyl planks, carpet tiles, cork, and more.

Silence For LVT UNDERLAYMENT SALES SHEET
